Designed and created

exclusively by **CALLAHEAD®** Corporation

is the **Sink Basin®** our commercial grade portable sink.

Whether you're a construction site, garage, lumber yard, marina,

nursery or cooking venue you will need a commercial grade sink for proper hygiene.

Our **Sink Basin®** is the first of its kind in the portable sanitation industry and was created for those heavy duty jobs that require a commercial quality sink when there is no running water. Standard with the **Sink Basin®** is Bosch's Ariston electric tank water heater, a top name in water heaters which supplies the user both hot and cold running water. The **Sink Basin®** is a spacious portable unit enclosed with a large commercial grade stainless steel sink with Delta faucet, Go Jo hand cleaning dispenser, paper towel dispenser, stainless steel mirror, comfort zone thermostat and convenience shelves. Washing facilities are a requirement at job sites and locations where there is contact with solvents, concrete, fiberglass, asbestos and other hazardous materials since they can cause long-term illness. The **Sink Basin®** is not only durable but handles those tough cleaning jobs for proper hygiene. For decades **CALLAHEAD®** Corporation has consistently created and developed new ways to answer our customer's needs. So as requirements for washing facilities increase for those tough jobs, the **Sink Basin®** has been created and available only exclusively from **CALLAHEAD®** Corporation.
