

WATER BASIN®

Designed and Created Exclusively by **CALLAHEAD®**

CALLAHEAD understands our client's need of variety when choosing a portable sink to make certain of a sanitary environment for themselves, their employees and guests. We are proud to add the **WATER BASIN** to our already extensive list of portable sink systems to give you many options to assure proper hygiene. The U.S. Center for Disease Control and Prevention has concluded, "Keeping hands clean is one of the most important ways to prevent the spread of infection and illness." Studies prove that regular proper handwashing can actually save lives making it a necessity to have washing facilities available at any public setting. The **WATER BASIN** is **CALLAHEAD's** vanity style sink system with double the handwashing capacity ideal for large job sites and events. The **WATER BASIN** is fully outfitted with two molded-in maintenance-free spigots, two high capacity spray soap dispensers and a lockable single fold paper towel dispenser. Attached is a large trash receptacle promoting users to toss away used paper towels to encourage cleanliness. The large cutouts at the bottom of the **WATER BASIN** allows for easy access to the two foot pumps for hand free washing and sanitation, fitting even a large work boot. Eliminating the need for risky bags or bladders the **WATER BASIN** has two hard sided 45 gallon fresh and grey water tanks so there is no risk of grey water contamination. With handles on all four sides of the **WATER BASIN** this unit is easy to maneuver. **CALLAHEAD** understands our clients job sites and special events vary in size and duration. Our goal is to offer our clients every option available in portable sinks to obtain proper hygienic protection for security of a healthier job site or event. With only quality equipment and superior service from a company who cares, **CALLAHEAD**.

Using the bathroom. • Handling irritating substances such as acids, solvents, or cement. • Before, during, and after preparing food. • Eating food. • Caring for someone who is sick. • Before and after treating a cut or wound. • Changing diapers or cleaning up a child who has used the bathroom. • Blowing your nose, coughing, or sneezing. • Touching an animal or animal waste. • Touching garbage. • Inserting or removing contact lenses. • Touching a sick or injured person.

SANITARY FACTS:

Keeping hands clean is one of the most important ways to prevent the spread of infection and illness. Infectious diseases commonly spread through hand-to-hand contact include the common cold, flu, and other illnesses. • The U.S. Center for Disease Control and Prevention has concluded, "handwashing" is the single most important means of preventing the spread of infection. • The hands are the most likely part of the body to come into contact with harmful substances. Failure to take basic precautions can lead to skin complaints such as dermatitis and eczema. You must avoid hand contact with any hazardous substance. • Inadequate hand hygiene contributes to food-related illnesses, such as salmonella and E. coli infection. According to the U.S. Center for Disease Control and Prevention, as many as 76 million Americans contract a food-borne illness each year. • For proper hygiene it is recommended to have a minimum of one (1) Washing Station per 4 restrooms. • "Handwashing" is a critical element in proper hygiene as germs can stay alive on hands for up to 3 hours.

RECOMMENDED USE FOR:

Construction job sites. • Special events (party, wedding, school function, marathon, charity event, Sporting event, festival etc.). • Protects children in playgrounds. • Safeguards food for grocery stores, farmers' markets, and outdoor food vendors. • Provide sanitary hand washing for food preparation areas. • Quality portable wash station and sanitation solutions to compliment any CALLAHEAD portable toilette. • 1 portable wash station is recommended by the Centers for Disease Control and Prevention for every 4 portable toilettes for proper hygiene. • 1 portable wash station for every 20 construction workers on a job site is recommended by the Centers for Disease Control and Prevention for proper hygiene.

HOW TO WASH YOUR HANDS:

Wet your hands with water. • Apply one dose of liquid soap and lather well for 15-20 seconds (or longer if the dirt is ingrained). • Rub hands together rapidly across all surfaces of your hands and wrists to help remove dirt and germs. • Don't forget the backs of your hands, your wrists, between your fingers and under your fingernails. • Wash your hands for at least 10 to 15 seconds. • Rinse well under running water and make sure all traces of soap are removed, as residues may cause irritation. • Pat your hands dry using paper towels. Make sure your hands are thoroughly dry. • Dry under any rings you wear, as they can be a source of future contamination if they remain moist. If possible, remove rings and watches before you wash your hands. • Each person should always use disposable paper towel or their own hand towel.
