

Air Conditioner

Introduced to the Portable Sanitation Industry by **CALLAHEAD**

The **CALLAHEAD** Frigidaire **AIR CONDITIONER** is a recommended addition for comfort when using our Guard Shed, Portashed or Portahead. Whether utilized for a security guard, ticket booth or money collector your employee will appreciate the comfort they will receive during their call of duty. Often guards are forced to sit outside their guard sheds due to discomfort from heat or need for better air circulation. Adding the **CALLAHEAD AIR CONDITIONER** to your unit will eliminate guards or ticket booth attendants from sitting outside complaining which encourages a poor reflection of the employer. In addition, the **AIR CONDITIONER** will assist employers in retaining better and happier employees which means improved job site operation and accomplished workers. This 5,000 BTU system is equipped with thermostat, energy saver and fan modes so the user can adjust it to their ideal comfort level. Adjustable louvers also allow the user to direct the air flow towards or away from them. The **AIR CONDITIONER** is easily operated with push button or dial operation depending on the model installed. **CALLAHEAD** installs the **AIR CONDITIONER** directly into your Guard Shed, Portashed or Portahead and maintains the unit so you don't have to. Understanding the needs of our customers so they may worry less and produce more efficient job sites is what sets **CALLAHEAD** apart from the rest.
