

CONTAINMENT TRAY

Introduced to the Portable Sanitation Industry by **CALLAHEAD**®

CALLAHEAD's CONTAINMENT TRAY is our heavy duty yet light weight tray placed beneath your portable toilet and used as a drip tray to contain water and cleaning solutions to eliminate leaks beneath your portable toilet. Made of the toughest polyethylene available, our **CONTAINMENT TRAY** is highly recommended to accompany every portable toilet rental to assist in meeting local, state, and federal run-off regulations. Any fluids that may leak will conveniently drain towards the rear of the tray to a pump out location for our uniformed service technician to remove when servicing. The **CONTAINMENT TRAY** fits under most portable toilets and is outfitted with peripheral lip to ensure fluids flow into the pan and not onto the ground. **CALLAHEAD** is always researching and creating new products to develop and evolve the portable sanitation industry to ensure quality, cleanliness and exceptional service to our customers. Our **CONTAINMENT TRAY** is just one of **CALLAHEAD's** many added accessories available to ensure you receive the best experience from your portable toilet rental.

DESIGN FEATURES: Thermoformed from tough, impact resistant high molecular weight, high density polyethylene. • Serves as a drip tray to contain water and cleaning solutions during servicing. • Fluids drain towards the rear of the tray to a convenient pump out location. • The trays have a peripheral lip that guides fluids into the pan. • Will fit beneath most portable restrooms. • Support ribs for extra strength beneath the "runners" to raise them out of fluids between servicing.

SPECIFICATIONS: Length: 49" • Width: 48" • Height: 4" • Weight: 26 lbs • Capacity (Empty): 39 gals
