

CALLAHEAD'S **FIRST AID** STATION

CALLAHEAD Corporation is a New York family-owned business providing the best in portable sanitation equipment since 1976. CALLAHEAD only serves the New York area to ensure our customers receive only the highest quality unmatched service, equipment as seen on our website, and our inventory never varies by location. The FIRST AID STATION is a CALLAHEAD brand designed by President and CEO Charles W. Howard. It is the first portable medical care supply station ever designed to provide quick and easy access first aid and trauma supplies in an emergency to any location. Ideal for construction job sites, public areas, private events, and businesses to help treat injuries before emergency medical treatment arrives. Our FIRST AID STATION also delivers supplies to treat minor cuts, burns, abrasions, eye irritations, or other minor injuries on the spot.

Mr. Howard designed the FIRST AID STATION to ensure all CALLAHEAD customers are prepared for accidents at the job site, sporting event, or any public area, no matter the location. CALLAHEAD's FIRST AID STATION rental delivers a convenient enclosed fully stocked first aid room when and where you need it. Construction jobs, schools and universities, sports fields, bus and train stations, parking lots, industrial plants, marathons, remote work areas, outdoor events, parks, music festivals, or any location with large groups of people and open to the public should have a FIRST AID STATION available.

CALLAHEAD's FIRST AID STATION offers privacy in an emergency with medical supplies in a hurry no matter where you are. The FIRST AID STATION includes two wall-mounted cabinets filled with first aid and trauma kit supplies. In addition, bench seating, shelving area, LED lighting, thermostat heat, and wall-mounted mirrors provide a comfortable and convenient location to attend to wounds, cuts, burns, sprains, eye irritations, and other severe injuries until medical assistance is attained.

Safety is vital for any successful business or event. A safe workplace is a productive workplace. The first way to prepare for accidents is always to have first aid stations available at any workplace. CALLAHEAD's FIRST AID STATION is equipped with products to follow OSHA (Occupational Safety and Health Administration) and ANSI (American National Standards Institute) requirements. A well-stocked and easily accessible first aid kit ensures your personnel is given the proper emergency treatment supplies in the event of an accident. While it is ideal to do our best to prevent accidents, unfortunately, they still do happen. When emergencies occur, you need to respond quickly, and CALLAHEAD's FIRST AID STATION on-site will do the job to provide medical supplies for peace of mind.

CALLAHEAD's FIRST AID STATION on-site is a smart and convenient choice to prepare for accidents which can help eliminate a tragedy with the necessary first aid and trauma equipment readily available without delay. Easily accessible first aid and trauma kits will immediately provide staff and the public emergency treatment when accidents happen. CALLAHEAD's FIRST AID STATION delivers emergency treatment products before professional medical care can be received as well as the products necessary to swiftly treat cuts, scrapes, burns, eye and skin irritations, or minor injuries immediately. Even minor accidents can become more severe if left untreated. Therefore, the FIRST AID STATION is not only recommended but required for safety and, in most circumstances, required by law for any location with large groups of people.

CALLAHEAD's FIRST AID STATION is constructed of durable, high-density polyethylene to handle any job site and high traffic locations. The exterior red coloring stands out along with its custom-designed CALLAHEAD first aid signage to quickly locate the FIRST AID STATION even from a distance. Inside the FIRST AID STATION are two separate medical kits wall mounted. A first aid essentials kit will provide treatment with an extensive list of supplies to handle cuts, burns, bug bites, eye rinse, bumps, bruises, sprains, and so much more. A second Trauma Kit assists with more serious injuries, including heavy bleeding, burns, eye irritations, broken bones, wounds, and casualty equipment, until medical professionals are available. Both kits include caregiver supplies to protect those providing assistance to the injured, such as antibacterial wash, medical gloves, masks, and shields. With the proper medical supplies available, you can avoid a tragedy making the FIRST AID STATION a must to every public setting.

The FIRST AID STATION delivers all the necessary first aid supplies while providing a spacious interior for comfort. The FIRST AID STATION has comfortable bench seating with faux leather cushion seats. Wall-mounted shelves were installed to assist with handling medical supplies. Mirrors are also wall-mounted and helpful for quick and easy self-help medical treatment.

Thermostat heat provides warmth inside during New York's cooler months. LED ceiling lights offer plenty of light for day and night use. In addition, they have molded-in wall vents to provide excellent ventilation and fresh airflow. An electrical cord can plug the FIRST AID STATION into a 110-volt outlet or generator to operate the light and heating system.

Supplying first aid kits is not only necessary for big businesses either. New York Assembly Bill A6027 requires small businesses with 50 employees or less to maintain a first aid kit on the business's premises at all times. Medical kits must be in an accessible location and available for use by any person who enters the business premises. Additionally, safety protocols for construction crews are a must. Since Construction is almost always outdoors, along a road, highway, a new build, or in a remote area, access to first aid supplies within a clean, comfortable enclosed environment is not typically available. CALLAHEAD's FIRST AID STATION will deliver the first aid and trauma essentials to ensure OSHA and ANSI guidelines are followed for job site safety to every construction job.

CALLAHEAD serves New York City's five boroughs, Brooklyn, Queens, Manhattan, Staten Island, and the Bronx, and all of Westchester, Nassau, and Suffolk Counties. Our professional uniformed delivery technician will deliver the FIRST AID STATION and place it in the location you select, filled with first aid and trauma supplies. CALLAHEAD's refill service is available with just a phone call to our office where one of our professional customer service and sales specialists will assist you.
