The **Guard Shed 25** is the best guard shed available on today's market. Unlike most of the competition, who simply cut windows out of standard portable toilets, we use high-strength fiberglass. The use of this material allows us to provide a weather-tight environment, The **Guard Shed 25** does not have floor and ceiling vents found in other guard shed/portable toilets. This unit is 5' x 5' and includes windows, a built-in heater, electrical outlet and a light. This large unit can handle two guards at once. Due to the durable/weather resistant fiberglass used to manufacture these units, they may be used during any season.

We're #1 At Picking Up #2
