

OCEAN SINK

Keeping your hands clean has always been necessary and one of the most important steps we can take for a healthy environment. Never before has handwashing been more important to eliminate the spread of dangerous germs, bacteria and deadly viruses such as the Coronavirus as it is today. Handwashing sinks or antibacterial stands are not a luxury but a necessity for every business, event and public setting. CALLAHEAD understands our client's also need variety when choosing a portable sink to make certain they can practice good hygiene for themselves, their employees and guests. CALLAHEAD offers dozens of hand sanitizing options to fit your locations need. The **OCEAN SINK** is yet another CALLAHEAD portable sink rental to accommodate any long-term job or short-term special event to ensure proper hand hygiene to help eliminate germs from spreading. The **OCEAN SINK** is completely self-contained, portable and requires no electric or water hook-up to operate.

The **OCEAN SINK** has an eye-catching ice blue and grey design with two stations that offer full fingertip to elbow washing. The sealed fresh water tank is hard sided and separate from the waste water tank to ensure proper hygiene. The hands-free foot pump operation is easy to use and also will eliminate the spread of germs. The **OCEAN SINK** is fully outfitted with two molded-in maintenance-free spigots, two high capacity pump soap dispensers and a single fold paper towel dispenser. This portable sink will provide two people the ability to utilize the sink at the same time all in one convenient rental. CALLAHEAD's **OCEAN SINK** is also easy to move around the jobsite or special event with handles on two sides.

The U.S. Center for Disease Control and Prevention has concluded, "Keeping hands clean is one of the most important ways to prevent the spread of infection and illness." Studies prove that regular proper handwashing can actually save lives, making it a necessity to have washing facilities available at any public setting.

The **OCEAN SINK** is an excellent rental for just about any public setting. Hospitals, construction sites, home renovations, schools, transportation centers, airports, churches and synagogues, office buildings, special events, medical testing and vaccine sites, shopping malls, bars and restaurants, parks, food trucks, and any long-term or short-term location with no water hook-up or require extra hand washing sinks. Every public location must have hand washing and sanitizing capabilities available to operate and eliminate the spread of life threatening germs and viruses such as COVID-19. Construction crews, contractors, and mechanics also need hand washing facilities to remove harmful substances as well as eliminate germs. In the food industry, hand washing is vital to eliminate the spread of food borne illnesses' such as salmonella and E. coli. In today's society there is no public setting where handwashing and hand sanitizing facilities are not required. CALLAHEAD's **OCEAN SINK** will provide everything you need for peace of mind and public safety.

The **OCEAN SINK** is available for same-day delivery to New York City's five boroughs of Manhattan, Brooklyn, Queens, the Bronx, and Staten Island, Westchester County and all of Long Island's Nassau and Suffolk Counties to Montauk Point. A CALLAHEAD professional uniformed delivery specialist will place the **OCEAN SINK** at the location you select.

SANITARY FACTS:

Keeping hands clean is one of the most important ways to prevent the spread of infection and illness. Infectious diseases commonly spread through hand-to-hand contact include the common cold, flu, SARS, H1N1, Coronavirus/COVID-19 and other illnesses. • The U.S. Center for Disease Control and Prevention has concluded, *"Handwashing is the single most important means of preventing the spread of infection."* • The hands are the most likely part of the body to come into contact with harmful substances. Failure to take basic precautions can lead to skin complaints such as dermatitis and eczema. You must avoid hand contact with any hazardous substance. • Inadequate hand hygiene contributes to food-related illnesses, such as salmonella and E. coli infection. According to the U.S. Center for Disease Control and Prevention, as many as 76 million Americans contract a food-borne illness each year. • For proper hygiene it is recommended to have a minimum of one (1) Washing Station per 4 restrooms. • *"Handwashing"* is a critical element in proper hygiene as germs can stay alive on hands for up to 3 hours.

HOW TO WASH YOUR HANDS:

The Center for Disease Control (CDC) affirms, *"Keeping hands clean is one of the most important steps we can take to avoid getting sick and spreading germs to others."* • Wet your hands with water. • Apply one dose of liquid soap and lather well for 15–20 seconds (or longer if the dirt is ingrained). • Rub hands together rapidly across all surfaces of your hands and wrists to help remove dirt and germs. • Don't forget the backs of your hands, your wrists, between your fingers and under your fingernails. • Wash your hands for at least 10 to 15 seconds. • Rinse well under running water and make sure all traces of soap are removed, as residues may cause irritation. • Pat your hands dry using paper towels. Make sure your hands are thoroughly dry. • Dry under any rings you wear, as they can be a source of future contamination if they remain moist. If possible, remove rings and watches before you wash your hands. • Each person should always use disposable paper towel or their own hand towel.
