PORTABLE SINK by CALLAHEAD

Washing hands after using the bathroom, before handling food, or when hands become soiled is routine for most Americans. However, when the world was hit with the COVID-19 pandemic, the importance of handwashing regularly throughout the day has never been more necessary for our society's health and safety. The **WATERFLOW Portable Sink** by CALLAHEAD delivers the ability to ensure handwashing capabilities are available when there is no plumbing and running water. The fact is, keeping hands clean is an easy solution to eliminate the spread of bacteria, germs, and viruses such as the coronavirus, colds, flu, SARS, E-Coli, salmonella, H1N1, etc. Every business must provide hand sanitizing amenities to protect the community. The **WATERFLOW** delivers two freshwater sinks, two antibacterial soap dispensers that kill 99.9% of germs, and two hand towel dispensers. Best of all, the **WATERFLOW Portable Sink** does NOT require any water hook-up or electricity to operate.

CALLAHEAD understands the importance of practicing good hand hygiene throughout the day. We also know that all locations are not one size fits all when renting portable sinks and portable antiseptic stands. This is why CALLAHEAD offers dozens of hand sanitizing options to accommodate every public or private situation. No job is too big or too small for CALLAHEAD. The **WATERFLOW** is one of the dozens of CALLAHEAD portable sink rental options for long-term jobs or short-term special events to help eliminate the spread of deadly germs and viruses. The **WATERFLOW** is a self-contained portable sink that can be used just about anywhere.

The **WATERFLOW** includes two handwashing stations with fingertip to elbow washing capabilities. The sealed freshwater tank is hard-sided and separate from the wastewater tank to ensure proper hygiene. A hands-free foot pump helps eliminate the spread of germs and is very easy to use. The **WATERFLOW Portable Sink** has two molded-in maintenance-free spigots, two high-capacity pump soap dispensers, and two single fold paper towel dispensers. CALLAHEAD also provides the antibacterial soap and hand towels for the dispensers on delivery. The **WATERFLOW** allows two users to wash at the same time. We are providing two sinks in one convenient, money-saving rental. The **WATERFLOW Portable Sink** also has handles on all four sides for easy maneuverability.

The U.S. Center for Disease Control and Prevention has concluded, *"Keeping hands clean is one of the most important ways to prevent the spread of infection and illness."* Studies prove that proper regular handwashing can save lives, making it necessary to have washing facilities available in any public setting.

The **WATERFLOW** is an excellent rental for just about any public or private location. Hospitals, supermarkets, shopping malls, private homes, construction sites, home or office renovations, schools, transportation centers, airports, churches and synagogues, office buildings, special events, medical testing and vaccine sites, bars and restaurants, parks, pools, beaches, museums, sporting events, food trucks, water shut-offs, government buildings and any long-term or short-term location with no water hook-up or require extra handwashing sinks to accommodate overflow are perfect locations for the **WATERFLOW Portable Sink** rental.

Construction crews and contractors working with paints and solvents and automobile and aviator mechanics also need handwashing facilities to remove harmful substances and eliminate the spread of germs. When working in the food industry, hand washing is essential to reduce the chance of food-borne illnesses and contamination such as salmonella and E. coli. The fact is, there is no business or public setting where handwashing and hand sanitizing facilities are not a requirement. CALLAHEAD's **WATERFLOW Portable Sink** delivers everything you need for portable hand sanitizing capabilities.

The **WATERFLOW Portable Sink** is available for same-day delivery to New York City's five boroughs of Manhattan, Brooklyn, Queens, the Bronx, Staten Island, Westchester County, and all of Long Island's Nassau and Suffolk Counties to Montauk Point. A CALLAHEAD professional uniformed delivery specialist will place the **WATERFLOW Portable Sink** at the location you select. CALLAHEAD offers convenient service options for long-term rentals to refill the **WATERFLOW Portable Sink** with fresh water and pump out the greywater daily, weekly, monthly, or upon request. A CALLAHEAD professional service technician will also sanitize the **WATERFLOW** with hospital-grade cleaners and re-stock the soap and paper towels at every service.

## HANDWASHING SANITARY FACTS:

Keeping hands clean is one of the most important ways to prevent the spread of infection and illness. Infectious diseases commonly spread through hand-to-hand contact include the common cold, flu, SARS, H1N1, Coronavirus/COVID-19 and other illnesses • The U.S. Center for Disease Control and Prevention has concluded, *"Handwashing is the single most important means of preventing the spread of infection."* • The hands are the most likely part of the body to come into contact with harmful substances. Failure to take basic precautions can lead to skin complaints such as dermatitis and eczema. You must avoid hand contact with any hazardous substance. • Inadequate hand hygiene contributes to food-related illnesses, such as salmonella and E. coli infection. According to the U.S. Center for Disease Control and Prevention, as many as 76 million Americans contract a food-borne illness each year. • For proper hygiene it is recommended to have a minimum of one (1) Washing Station per 4 restrooms. • *"Handwashing"* is a critical element in proper hygiene as germs can stay alive on hands for up to 3 hours.

## HOW TO WASH YOUR HANDS:

The Center for Disease Control (CDC) affirms, *"Keeping hands clean is one of the most important steps we can take to avoid getting sick and spreading germs to others."* • Wet your hands with water. • Apply one dose of liquid soap and lather well for 15–20 seconds (or longer if the dirt is ingrained). • Rub hands together rapidly across all surfaces of your hands and wrists to help remove dirt and germs. • Don't forget the backs of your hands, your wrists, between your fingers and under your fingernails. • Wash your hands for at least 15-20 seconds. • Rinse well under running water and make sure all traces of soap are removed, as residues may cause irritation. • Pat your hands dry using paper towels. Make sure your hands are thoroughly dry. • Dry under any rings you wear, as they can be a source of future contamination if they remain moist. If possible, remove rings and watches before you wash your hands. • Each person should always use a disposable paper towel or their own hand towel.
