

The Killy Stand by CALLAHEAD

CALLAHEAD designed and manufactured the **KILLY Antiseptic Stand** rental to deliver two hospital grade antibacterial dispensers to any location. Providing hand sanitizing capabilities is a necessity for every business, employer, government agency, emergency location, medical facility, special event and public area to maintain a healthy environment and eliminate the spread of germ causing illnesses. CALLAHEAD understands portable sinks are not always an option for every situation. CALLAHEAD designed and developed the **KILLY Antiseptic Stand** so every location can have hospital grade hand sanitizing capabilities no matter where they are located for long-term and short-term rental needs. The **KILLY Antiseptic Stand** is a public health solution, killing 99.9% of germs and bacteria that can cause life-threatening illnesses when soap and water are not available.

The **KILLY Stand** is constructed of recycled treated plywood and is hand sanded and sealed. The X-base design will counter weight to keep the stand sturdy while in use and is painted an attractive blue color. The stand is equipped with two 800ml dispensers filled with hospital grade antiseptic gel. CALLAHEAD's hand sanitizer gel kills over 99.9% of germs and contains vitamin E. Each dispenser holds 27 fluid ounces and is attached to both sides of the **KILLY Antiseptic Stand**. Users will receive .544 grams of hospital grade hand sanitizer at each pump delivering approximately 1,296 uses per dispenser. With CALLAHEAD's **KILLY Antiseptic Stand** you receive two dispensers to provide jobsites, hospitals, office buildings and events a total of approximately 2,562 uses before refills are required. CALLAHEAD offers refill service daily, weekly, monthly or on-call when needed.

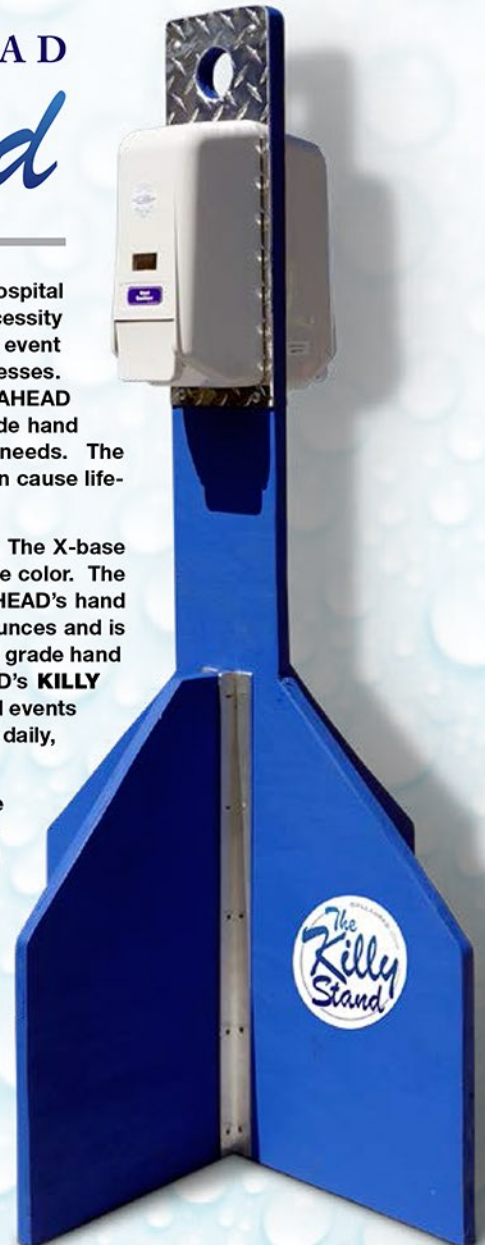

CALLAHEAD's **KILLY Antiseptic Stand** has two stand options. Our standard all wood base or our wood base with a metal lifting plate with a circular opening at the top of the stand to easily attach a lifting hoist, rope, hook or security chain with locking system. The metal lifting plate is the ideal solution to transport the **KILLY Antiseptic Stand** up into high-rise building construction jobs, lower into tunnel job sites or lift across the water onto a barge. The **KILLY Antiseptic Stand** is in such high demand, the metal plate can be used to padlock the **KILLY Stand** at your location to avoid theft and keep it safely placed at the location you select.

In today's society hand sanitizer dispensers have become increasingly popular with the more educated the public has become on its benefits. Colds, flu's, Coronavirus, H1N1, COVID-19, SARS, E-Coli, Salmonella, and other common illnesses are often spread through the transfer of germs through touch and hand to hand contact. You can significantly reduce the risk of illness by washing your hands or using hand sanitizers frequently throughout the day. CALLAHEAD's **KILLY Antiseptic Stand** is quick and easy to use to achieve proper hand sanitizing. The antiseptic gel provided and refilled by CALLAHEAD, kills 99.9% of germs and bacteria that can cause serious illnesses.

The **KILLY Antiseptic Stand** is not only for construction job sites it is for every public area. Germs are easily transmitted from frequently touched surfaces such as door handles and knobs, handrails, elevator buttons, and light switches. Bacteria and viruses can stay on metal, plastic and cardboard for as long as several days. Frequently touched surfaces can quickly spread viruses by your hands touching any contaminated surface. The **KILLY Antiseptic Stand** is the perfect answer to help ensure a healthy environment for every office or government building, shopping center and shopping mall, grocery store, train station, bus stop, airport, taxi stand, parking garage, hospital, medical office, park, beach, restaurant or any public area. The **KILLY Antiseptic Stand** can be placed by entries, exits and elevators inside office buildings, store entry and exit areas, inside retail facilities by check-out stands and cashier stations, ticket and transportation centers, outdoor food trucks and venues, restaurant entry and exit doors, medical buildings and hospitals, outside public restrooms, or any high traffic location for the public's hygienic protection. The **KILLY Antiseptic Stand** is critical for emergency locations such as pop-up hospitals and medical facilities, doctors' offices, hurricane relief locations, disaster areas, or any emergency situation. Hand sanitizing is strongly recommended by the Center for Disease Control (CDC) every time you use the restroom, cough, sneeze, before and after eating, preparing food, as well as to be used periodically throughout the day to help avoid contact with harmful germs and bacteria that can cause serious illness.

Publications by The Center for Disease Control (CDC) and The Occupational Safety and Health Act (OSHA) conclude that handwashing is proven protection from the spread of many serious illnesses. Presented with this information confirms handwashing or sanitizing equipment is essential for every business, construction job site, public and social setting and special event. Just a pump of gel and rub your hands together, our quick drying sanitizer will protect users from harmful diseases and infections that are commonly spread through hand-to-hand contact. CALLAHEAD, along with the CDC recommends that hand sanitizers or handwashing facilities are a requirement for every business and public venue such as, construction job sites, food venues, supermarkets, office buildings, sporting facilities, arenas, beaches, parks, parties, farmer's markets, carnivals, playgrounds, schools, daycare facilities, marathons etc.

The **KILLY Antiseptic Stand** rental is available for same-day delivery. CALLAHEAD services all of New York City's five boroughs of Manhattan, Brooklyn, Queens, the Bronx and Staten Island, Westchester County and all of Nassau and Suffolk Counties Long Island to Montauk Point.

BENEFITS OF OUR KILLY ANTISEPTIC STAND:

More accessible than sinks • Reduce bacterial counts on hands • Requires less time than hand washing • Acts quickly to kill microorganisms on hand • Less irritating to skin than soap and water • No sink, no water, no rinse, no towel & no mess • Meets OSHA and Health Department hand cleansing requirements • Soothing rich emollients such as Vitamin E help to keep hands soft even after repeated use

HAND SANITIZER TECHNIQUE:

1. Make sure all organic matter is removed from hands. All visible organic matter (for example: dirt) should be removed from hands prior to applying waterless hand sanitizer. 2. Apply a dime sized amount of waterless hand sanitizer to the palm of one hand or use a waterless hand sanitizer wipe. 3. Rub hands together covering all surfaces of hands and fingers. 4. Rub until waterless hand sanitizer is absorbed.

IMPORTANT SAFETY AND HEALTH FACTS:

The Center for Disease Control (CDC) affirms, "Keeping hands clean is one of the most important steps we can take to avoid getting sick and spreading germs to others." • The Occupational Safety and Health Act (OSHA) require employers to provide adequate washing facilities for employees that work with contaminants that may be harmful. • The Association for professionals in Infection Control and Epidemiology (APCI) position, "Although people usually think that germs are spread through the air, the fact is that germs are most easily spread through HAND CONTACT." AND "One of the best ways to avoid getting sick or spreading illness is to wash OR to decontaminate your hands." • The Center for Construction Research and Training (CPWR) states, "Lack of cleaning facilities on construction job sites increases the likelihood of dermatitis, caustic burns from extended contact with wet cement, or acid burns from muriatic acid or other hazardous agents that come in contact with the skin, and infection." The result, additional workers' compensation claims. • The Center for Disease Control (CDC) estimates that 36,000 people die from the flu or flu-like illness each year, and another 5,000 people die from food borne illness each year. And your best protection from this type of illness is frequent hand washing.
