CALLAHEAD'S PORTERHOUSE 25 RESTROOM

The PORTERHOUSE 25™ Restroom by CALLAHEAD™ is not just a portable restroom—it is a one-of-a-kind work of art unlike anything anywhere in the world. Designed by Charles W. Howard, President and CEO of CALLAHEAD™—an award-winning builder, designer, and prolific inventor—the PORTERHOUSE 25™ Restroom brings the atmosphere of an old-world New York steakhouse to any outdoor location. The instant the door opens the striking design leaves a lasting impression.

Once you step inside the PORTERHOUSE 25™ Restroom, the interior feels more like a custom-built room than a portable unit, with rich black walls framed in warm wood trim and highlighted by elegant gold accents throughout. A gorgeous wood vanity with gold trim provides storage and supports a porcelain sink with hot and cold running water, set beneath a striking gold leaf mirror that immediately recalls an old-world New York steakhouse. A gold soap dispenser and hand dryer are wall mounted above the sink for convenience. A porcelain pedal low flush toilet bowl sits beside a beautifully detailed gold toilet paper holder. Overhead, thermostat-controlled air conditioning and a wall mounted fan forced heater ensure year-round comfort. The gold trimmed decorative ceiling lighting washes the roomy interior in a warm, flattering glow, completing a look that feels permanent, luxurious, and unlike any portable restroom ever seen.

Charles W. Howard has been building, designing, and inventing for CALLAHEAD™ since the age of 12, dedicating his life to transforming portable sanitation from a basic necessity into an elevated experience.

Since 1976, CALLAHEAD™ has been recognized as the world's greatest portable sanitation company, continually introducing industry "firsts" that others try to imitate but can never equal.

Guided by the CALLAHEAD™ mission statement, "To Develop and Evolve a Human Necessity™", CALLAHEAD™ creates exclusive equipment that looks, feels, and performs far beyond the expectations of a typical portable restroom. The PORTERHOUSE 25™ Restroom is one of his most striking expressions of that vision—designed by Charles W. Howard and manufactured exclusively and available only by CALLAHEAD™.

For half a century, CALLAHEAD™ has been in business, continually setting the standard for portable restroom design, engineering, and service. Since 1976, CALLAHEAD™ has operated exclusively in New York, allowing the company to focus 100% of its effort on serving New York's construction, commercial, and special event markets with unmatched attention to detail and customer service.

Today, CALLAHEAD™ is New York's oldest portable restroom company, and its long history of original inventions, patented systems, and designer restrooms has made CALLAHEAD the definitive expert in the portable sanitation industry. By designing and manufacturing its own equipment and serving only New York, CALLAHEAD™ maintains total control over quality, innovation, and responsiveness, delivering a level of consistency and excellence that no other company can match.

WHY THE NAME "PORTERHOUSE"

The name PORTERHOUSE was chosen because every aspect of this restroom is inspired by the warmth and sophistication of an old-world New York steakhouse like Peter Lurgars.

From the outside, the PORTERHOUSE 25™ Restroom stands out instantly: Bold black exterior panels framed with rich brushed gold aluminum trim • Gold vertical panels reminiscent of classic wood-and-brass restaurant fronts. • A solid, well-proportioned entry door with a gold door handle, hinting at the luxury inside • The entire unit mounted on caster wheels with brakes for precise placement and secure locking Center stage on the exterior is the CALLAHEAD™ gold signage: a heavy, engraved plaque reading "CALLAHEAD™ NEW YORK". Set against the textured black wall and framed in brushed gold, this plaque looks like the nameplate on an exclusive private club. It signals immediately that this is a CALLAHEAD™ original and that nothing about this restroom is ordinary.

INTERIOR STYLE – A PRIVATE ROOM IN A STEAKHOUSE

Step inside and the steakhouse concept is fully realized: Deep black wall panels framed with warm, stained wood posts and beams, creating a rich, intimate, club like interior • An old world gold framed mirror above the vanity, reminiscent of a private room in a historic Manhattan steakhouse • A wood vanity cabinet with gold accents and classic hardware, more like custom furniture than job site equipment • Non slip black flooring finished with gold trim, tying the floor into the black and gold design and framing the interior like a stage The experience leaves a powerful, positive impact that feels truly exhilarating. Guests enter expecting a portable unit and instead find themselves in what feels like a permanent, high-end restaurant restroom. There is simply nothing else like it anywhere in the world. Charles W. Howard's quote, "Perfection is a Matter of Opinion Therefore it Exists™", is fully visible in the PORTERHOUSE 25™ Restroom. Every material, proportion, and detail has been chosen to achieve his personal vision of a perfect single user luxury portable restroom.

GOLD ACCENTS & FIXTURE DETAILS

The PORTERHOUSE 25™ Restroom uses gold accents not as decoration alone, but as part of a carefully orchestrated design language: Gold door handle with interior privacy lock and an exterior keyed lock for security • An old world gold mirror frame that becomes the central visual focus over the vanity • A gold soap dispenser mounted at the sink, matching the mirror and hardware • Gold accents on the vanity—including handles, trim, and faceplates—that complete the steakhouse look • A beautifully detailed gold toilet paper holder, mounted on a rectangular gold backplate with an ornate rosette and curved cover, like something found in a fine hotel or historic townhouse Even the overhead lighting has been elevated. Each recessed light is surrounded by an intricately patterned gold trim ring, turning a simple ceiling light into a piece of jewelry set into the dark ceiling. This warm, focused light highlights the wood, gold, and porcelain, adding drama and depth to the space.

The CALLAHEAD™ AIRWAVE™, a wall-mounted black hand dryer, complements the gold and wood accents by blending seamlessly into the black wall panel. This design helps keep the interior clean and efficient without disrupting the overall aesthetic.

PORCELAIN VANITY, HOT/COLD WATER & GOLD-ACCENTED WASH AREA

The PORTERHOUSE 25™ Restroom reinforces its true indoor bathroom feel with a beautifully detailed porcelain vanity and fully functional wash area. A white porcelain sink is set into a rich wood vanity with elegant gold accents, providing both visual warmth and practical counter space. Above the sink, a 20" x 16" antique brass vanity mirror creates a classic steakhouse look, while a stainless brass wall-mounted soap dispenser and brass designer towel ring holder keep everything within easy reach. For touch-free drying, a wall-mounted CALLAHEAD™ AIRWAVE™ hand dryer is installed, maintaining cleanliness and reducing paper waste. The sink is supplied with hot and cold running water heated by a Braun hot water heater and delivered through a chrome-plated brass automatic shut-off faucet, ensuring proper handwashing while conserving water. Together, these elements make the PORTERHOUSE 25™ Restroom wash area feel indistinguishable from a high-end indoor restroom.

MARINE-GRADE SEALAND BY DOMETIC® PORCELAIN PEDAL-FLUSH TOILET

The PORTERHOUSE 25™ Restroom is equipped with a premium Sealand by Dometic® porcelain flush toilet bowl, the same low-flush toilet trusted throughout the marine industry on luxury yachts. This is not a plastic porta potty seat, but a true, full-weight porcelain bowl that gives users the solid, secure feel of a permanent indoor restroom. The toilet operates with hands-free, foot-pedal flushing, allowing the user to flush without touching any levers or handles, which greatly enhances hygiene. Its low-flush design is engineered to conserve water while still delivering a powerful, clean rinse every time. By specifying a Sealand by Dometic® marine-grade porcelain toilet, CALLAHEAD™ ensures the PORTERHOUSE 25™ Restroom offers the same level of quality and performance found on high-end yachts and luxury vessels for the best possible restroom experience.

CLIMATE CONTROL –COMFORT FOR WINTER & SUMMER

The PORTERHOUSE 25™ is engineered for comfortable use in every season: A roof mounted thermostat controlled air conditioning unit keeps the interior cool and pleasant during hot New York summers • A fan forced heater provides powerful, even heat during cold winter months With these climate systems, the PORTERHOUSE 25™ Restroom remains comfortable and inviting regardless of outside temperatures, making it suitable for long term and short-term jobs and special events throughout the year.

CONSTRUCTION & ENGINEERING

Beneath its refined appearance, the PORTERHOUSE 25™ Restroom is built to CALLAHEAD™'s highest engineering standards: All aluminum structural frame for strength and corrosion resistance • Marine grade starboard components for durability in demanding environments • Aluminum exterior sheeting with black and brushed gold styling that looks architectural, not temporary • Stainless steel fasteners to prevent rust streaks and preserve a clean finish • Aluminum skid base and strong sub frame designed for daily use and transport • Four 4" caster wheels with brakes for easy movement and secure placement on any job site or event location

This gives the PORTERHOUSE 25™ Restroom the toughness needed for construction environments, while its design makes it equally appropriate for high end venues.

PERFECT FOR JOB SITES AND HIGH-END EVENTS

Thanks to its combination of rugged construction and dramatic design, the PORTERHOUSE 25™ Restroom is ideal for: Weddings, baby and bridal showers birthdays • Birthdays and graduation parties • Catering halls and event venues • Private parties, corporate functions, and special events • Restaurants, bars, and nightclubs needing added upscale restroom capacity • Country clubs, golf courses, yacht clubs and marinas • Film, television, and commercial production locations • Red carpet events and awards ceremonies • VIP areas and hospitality suites at any major event • Government buildings and events • Corporate offices and hotels in need of additional restrooms • Any short-term event or long-term location wanting the best restroom on-site. Wherever the PORTERHOUSE 25™ Restroom is placed, it sends a clear message: you care about quality and image to the highest degree.

SERVICED ONLY BY CALLAHEAD™ IN NEW YORK

Every PORTERHOUSE 25™ Restroom is: Delivered, positioned, and serviced by uniformed CALLAHEAD™ technicians • Cleaned using only hospital grade cleaners and disinfectants • Fully restocked with soap, paper towels, and restroom paper products when serviced is required • CALLAHEAD™ serves New York City's five boroughs—Brooklyn, Queens, Manhattan, the Bronx, and Staten Island—as well as Westchester, Nassau, and Suffolk Counties up to Montauk Point. This ensures full control of equipment condition, service quality, and field presentation.

ADVANCED, COMPLETELY SELF-CONTAINED PLUMBING SYSTEM

The PORTERHOUSE 25™ Restroom is engineered with a sophisticated, completely self-contained plumbing system that delivers true indoor bathroom performance while maintaining the highest sanitary standards. The porcelain sink with hot and cold running water operates on its own dedicated fresh water tank and on-demand pump, while the low-flush porcelain toilet bowl is supplied by a separate fresh water tank and its own independent pump. By keeping the sink and toilet water systems completely separate, the design eliminates any risk of cross-contamination and ensures maximum hygiene. The low-flush toilet functions just like a home toilet, giving users a familiar, comfortable experience while conserving water with every flush. All fresh water and grey/waste water tanks are equipped with exterior marine-grade inspection hatches, making refilling and servicing both clean and efficient. Because everything is fully integrated inside the unit, the PORTERHOUSE 25™ Restroom arrives at your site as a completely self-contained restroom, ready to operate without any on-site plumbing connections.

THE FIRST DESIGN OF ITS KIND – A CALLAHEAD™ ORIGINAL

There has never been a portable restroom like the PORTERHOUSE 25™ Restroom. From its black and brushed gold exterior with engraved CALLAHEAD™ New York plaque, to golden wood trim, black interior, porcelain fixtures, hot and cold running water, gold accents, non-slip black floor with gold trim, overhead gold ringed lighting, and roof mounted climate control, it is truly the first and only restroom of its kind in the world. Designed by Charles W. Howard, who has been building, designing, and inventing for CALLAHEAD™ since the age of 12, the PORTERHOUSE 25™ Restroom represents the highest expression of his decades of innovation and craftsmanship. In a world full of ordinary portable toilets, the PORTERHOUSE 25™ Restroom stands alone. There is nothing anywhere in the world like it—and there is only one company with the vision and ability to create it: CALLAHEAD™, the world's greatest portable sanitation company.
