## CALLAHEAD™'S SKY BOWL™ RESTROOM

CALLAHEAD's SKY BOWL RESTROOM stands out as a remarkable innovation and is the first of its kind in the industry. Invented by Charles W. Howard, the President and CEO of CALLAHEAD, who is renowned for his expertise in building, design and countless inventions for CALLAHEAD, the SKY BOWL was designed for commercial properties equipped with a sewer, cesspool, or holding tank. A prolific prodigy since he was a young boy, Mr. Howard has dedicated his life to innovation and leadership.

Since 1976, that vision has driven CALLAHEAD to change the world and has made CALLAHEAD the world's greatest portable sanitation company. Unlike traditional portable toilets, the SKY BOWL features a robust commercial porcelain flush toilet and includes a built-in stainless steel handwashing sink, delivering the full experience of a high-quality public restroom. This versatile restroom is ideal for use in skyscrapers, high-rise offices, ships, docks, warehouses, parks, energy plants, industrial facilities, or any other commercial site with access to domestic water or tank water. CALLAHEAD's SKY BOWL is frequently rented to accompany crews working on various floors of tall buildings, offering effortless relocation. Its slim profile and sturdy wheels allow for easy navigation through elevators, corridors, gates, and alleyways, with locking diecast wheels ensuring secure placement. The restroom can also be lifted by a hoist and transported by crane or similar machinery to virtually any location, including barges and ships. Built with high-grade marine plastic, stainless steel, and aluminum, the entire unit is engineered to endure demanding worksites and harsh weather conditions.

CALLAHEAD'S SKY BOWL RESTROOM is a unique solution, exclusively created, produced, and distributed by CALLAHEAD, with the convenience of same-day or next-day delivery. Available in a selection of ten colors—Blue, Green, Orange, Brown, Yellow, Black, Indigo, Arctic White, Dolphin Gray, and Red—it can be coordinated with the aesthetic of any commercial site. This SKY BOWL unit provides private restroom facilities for any business location where water and sewer connections are accessible. Built from sturdy commercial-grade marine plastic, stainless steel, and aluminum, the SKY BOWL RESTROOM resists rust and corrosion, fostering an environment that discourages mold and algae growth. Its aluminum-clad exterior framing offers a sleek appearance while also serving a functional purpose: it diffuses wind pressure, helping prevent the unit from tipping over. The fully enclosed, marine-grade plastic roof is designed with a steep pitch to ensure rainwater runs off efficiently, eliminating leaks.

Security and privacy are essential in the SKY BOWL restroom's design. Its spring-loaded door is engineered to stay always closed. Both interior and exterior door pulls are included, complemented by an interior privacy lock. For enhanced protection, users can secure the unit externally with a padlock and internally with a sturdy stainless steel sliding barrel bolt latch. CALLAHEAD also provides a padlock to prevent unauthorized public access. Additionally, the door's unique construction—shortened by 4 inches at both the top and bottom—ensures superior ventilation. Stainless pressed CALLAHEAD signage on the exterior signifies the premium quality of the SKY BOWL restroom.

Inside the SKY BOWL, you'll find a wall-mounted low flush porcelain Siphon Jet toilet featuring an anti-microbial ceramic glaze. This creates a permanent surface that actively inhibits the growth of stains and odor-causing mildew, ensuring a clean and sanitary environment. The toilet is equipped with a 1.1–1.28 gallon per flush single-lever flushometer, delivering a strong, low-volume flush and includes a 3-inch rubber coping for easy connection. The filled toilet paper holder is easily accessible.

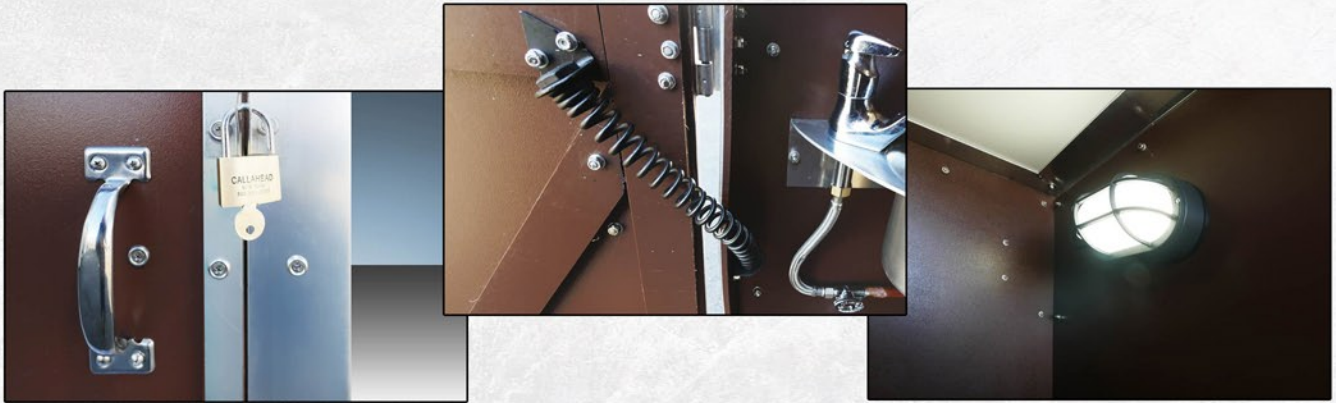

The SKY BOWL also features a wall-mounted 6-inch deep by 6-inch round stainless steel handwashing sink. It is outfitted with a chrome-plated single-lever auto-metered faucet, a chrome-plated brass trap, and a copper feed to a stainless-steel braided hose connection. The metered faucet dispenses water at 0.5 gallons per minute, providing efficient handwashing capability while conserving water. The interior features smooth walls without any framing, making movement inside the unit effortless. The flooring is fitted with aluminum grip plates to help prevent slips and falls. Ample illumination is provided by a 6.2W 500K LED bulkhead light, which operates via a standard 110-Volt outdoor extension cord plugged directly into the unit's side.

The SKY BOWL is engineered for use in locations with existing sewage infrastructure, including sewers, cesspools, holding tanks, and on-site water sources. Featuring a rear exit toilet bowl system, it is equipped for discharge via a black steel PVC pipe or hose hook-up. At the unit's rear exterior, a 3-inch discharge connection enables straightforward waste management by linking directly to a sewer, cesspool, or holding tank. Fresh water can be supplied to both the toilet bowl and sink through the SKY BOWL'S external 3/4-inch hose bib connections, accommodating standard heavy-duty garden hoses. The unit incorporates 3-inch lockable front wheels with 360-degree pivot capability and 3-inch fixed rear wheels, all semi-recessed to minimize potential damage. Once positioned, the SKY BOWL RESTROOM can be securely locked in place for enhanced site safety.

The SKY BOWL RESTROOM is easy to move to any location using equipment like cranes, boom trucks, bulldozers, or forklifts. Its exterior frame, clad in aluminum, allows it to be lifted with chains, straps, or cables. Whether you need a restroom on an upper floor of a building or on a ship, the design and mobility of the SKY BOWL RESTROOM make it the ideal choice. CALLAHEAD's SKY BOWL offers a cost-effective solution for crews working on multiple levels by providing a private, porcelain flush toilet anywhere it's needed. This convenience reduces unnecessary work interruptions and helps prevent revenue loss for employers. Thanks to its ability to attach to cranes, the unit can be placed on any floor that best serves your team. At just 31 inches wide, the SKY BOWL RESTROOM moves smoothly through doorways, elevators, alleys, and hallways.

The SKY BOWL is available for same day or next day delivery across all five boroughs of New York City—Manhattan, Brooklyn, Queens, Staten Island, and the Bronx—as well as throughout Westchester, Nassau, and Suffolk Counties on Long Island, extending to Montauk Point. As the first portable restroom of its kind, the SKY BOWL features a commercial-grade flush porcelain toilet and a stainless-steel handwashing sink, designed by Charles W. Howard and manufactured by CALLAHEAD for commercial applications. This unit provides enhanced comfort and sanitation tailored specifically for high-rise construction sites and commercial locations equipped with water, sewer, cesspool, or holding tank facilities. Construction teams benefit from private access to a restroom that functions like those found in public facilities.

#### THE SKY BOWL RESTROOM OPTIONAL ACCESSORIES TO RENT:

For added convenience, we are proud to offer the below list of optional accessory items for your SKY BOWL RESTROOM rental. All CALLAHEAD's rental accessories were selected to provide the same comforts and hygienic protection as using an indoor restroom. CALLAHEAD's restroom accessory items are unmatched in the portable restroom industry and include:

Antiseptic Dispenser can be installed inside the SKY BOWL RESTROOM filled with our waterless hand sanitizer. Our waterless hand sanitizer kills 99.9% of germs and bacteria and meets OSHA and Health Department requirements. The antiseptic dispenser is perfect for sanitary protection before and after using the restroom. The antiseptic dispenser supplies approximately 900 – 1300 applications and is 100% maintained and refilled when needed by CALLAHEAD with its rental. • GoJo Hand Cleaning Dispenser installed inside the SKY BOWL RESTROOM and filled with the #1 heavy duty GoJo hand cleaner. GoJo hand cleaner is popular among auto mechanics for its ability to quickly break down grease and grime. GoJo Hand Cleaner has become popular with construction workers and contractors to remove acids, cement and other solvents from hands. 100% maintained and refilled when needed by CALLAHEAD with its rental.

#### THE SKY BOWL IS IDEALLY SUITED FOR THE FOLLOWING:
